Subject: Re: Fw: First Cut of Data Adequacy for Modeling Losses from NBH CADs

Dave,

They can access all the actual data in the NBH database, have you used it yet? That's what we've been doing for the long term monitoring paper that Skip is working on. The link is <http://www.duxbury.battelle.org/NBH/home/index.cfm> and whoever is gathering the data has to create an account. It's fairly user friendly but if anyone has questions, they can contact Skip or myself. I use the query engine: crosstab and the study identifier for the 1993 data is NBH LTM1993.

Barb

	Subject	Fw: First Cut of Data Adequacy for Modeling Losses from NBH CADs

Skip and Barb - we have a request for the backup data to the 1996 baseline LTM report. Paul Schroeder and Carlos Ruiz from ERDC are going to be helping us with some CAD cell modeling (different from the foodchain modeling that ERDC is also helping with) and they've requested the actual data from the 1993 sampling which was used for the 1996 report. Are you the right people to talk to for this? If so can you contact Paul to work out the details?

Thanks - Dave

Subject	First Cut of Data Adequacy for Modeling Losses from NBH CADs

I am attaching a document that summarizes the data that we have found for modeling losses from CAD cells. In it, we have indicated our preliminary assessment of the adequacy of the data. I believe that this will aid our discussion in our conference call on Monday, May 12. In addition, it may help to identify any data that we may be missing.

Paul Schroeder
